Sanad - Use Case Descriptions

UC-E01: Manage routine profile

Brief Description: The system saves the member's daily habits, like when they wake up, eat, and take their medication, so it can accurately spot when something unusual happens.

Actor(s): Care Coordinator

Triggering Event: Routine information is set or changed

UC-E02: Record informed consent

Brief Description: The system securely logs the video call details and the member's formal agreement to be monitored by Sanad.

Actor(s): Care Coordinator, Elderly Member

Triggering Event: Member gives informed consent

UC-E03: Complete consent review

Brief Description: The system records that the care coordinator has completed the required six-month check-in, keeping the member's monitoring active.

Actor(s): Care Coordinator

Triggering Event: Six-month consent review is completed

UC-E04: Withdraw consent

Brief Description: The system immediately stops all monitoring and updates the records as soon as a member decides to withdraw their consent.

Actor(s): Elderly Member

Triggering Event: Member withdraws consent

UC-E05: Book care visit

Brief Description: The system schedules a new caregiver visit, whether for shopping, cleaning, or just company, for a specific date and time.

Actor(s): Family Contact, Caregiver Team Lead

Triggering Event: Care visit is requested

UC-E06: Assign caregiver to visit

Brief Description: The system matches an available caregiver to a scheduled visit, making sure their skills, language, location, and daily hours line up perfectly.

Actor(s): Caregiver Team Lead

Triggering Event: Caregiver is assigned to a visit

UC-E07: Check in to visit

Brief Description: The system uses a secure code to confirm that the caregiver has arrived at the member's home and marks the visit as in-progress.

Actor(s): Field Caregiver

Triggering Event: Caregiver arrives and checks in

UC-E08: Check out of visit

Brief Description: The system uses a check-out code to confirm the caregiver is leaving, automatically logging the exact time spent for their payroll.

Actor(s): Field Caregiver

Triggering Event: Caregiver leaves and checks out

UC-E09: Submit visit note

Brief Description: The system saves the short summary note that the caregiver writes after finishing their visit.

Actor(s): Field Caregiver

Triggering Event: Caregiver submits visit note

UC-E10: Rate completed visit

Brief Description: The system records the 1-to-5 star rating given by a family member to review the caregiver's performance after a visit.

Actor(s): Family Contact

Triggering Event: Family rates a completed visit

UC-E11: Subscribe to care plan

Brief Description: The system handles a family member's request to sign up for a monthly care plan, officially starting the Sanad service for their relative.

Actor(s): Family Contact

Triggering Event: Family subscribes to a care plan

UC-E12: View daily wellbeing summary

Brief Description: The system shows family members a daily snapshot of how their relative is doing, covering their sleep, meals, visits, and overall safety.

Actor(s): Family Contact

Triggering Event: Family opens daily summary

UC-E13: Send voice message

Brief Description: The system lines up a voice message recorded by a family member so it can be played out loud on the member's smart speaker.

Actor(s): Family Contact

Triggering Event: Family sends a voice message

UC-E14: Confirm safety

Brief Description: The system listens for the member to verbally answer the smart speaker and clears the alert once they confirm they are okay.

Actor(s): Elderly Member

Triggering Event: Member answers the speaker check-in

UC-E15: Pause monitoring

Brief Description: The system lets the member pause the normal monitoring rules for up to 24 hours whenever they want some privacy.

Actor(s): Elderly Member

Triggering Event: Member pauses monitoring

UC-E16: Enable Away Mode

Brief Description: The system turns off alerts for things like an empty house when the member goes traveling, while keeping the hard-fall detector working.

Actor(s): Elderly Member

Triggering Event: Member enables Away Mode

UC-E17: Disable Away Mode

Brief Description: The system turns regular home monitoring back on when the member returns from traveling and turns off Away Mode.

Actor(s): Elderly Member

Triggering Event: Member disables Away Mode

UC-E18: Record family response

Brief Description: The system stops calling down the emergency contact list once a family member answers the phone and confirms they are handling the alert.

Actor(s): Family Contact

Triggering Event: Family contact answers escalation call

UC-E19: Record urgent-visit arrival

Brief Description: The system logs exactly when a dispatched caregiver arrives at the home during an urgent situation to make sure they met the 45-minute target.

Actor(s): Field Caregiver

Triggering Event: Dispatched caregiver arrives at member's home

UC-E20: Respond to non-urgent alert

Brief Description: The system assigns a non-urgent community alert to a vetted local volunteer once they accept the request.

Actor(s): Neighbor Volunteer

Triggering Event: Volunteer responds to an alert

UC-E21: Record emergency dispatch outcome

Brief Description: The system logs the outcome of the automated call to the 123 emergency service, noting whether the dispatch was successfully confirmed.

Actor(s): Emergency Services (123)

Triggering Event: Emergency Services confirm dispatch

UC-E22: Review service performance

Brief Description: The system pulls together a performance report for the director, showing things like false alarms, response times, and member trends.

Actor(s): Founder and Director

Triggering Event: Director requests service performance report

UC-E23: Review subscriptions and invoices

Brief Description: The system lets the director check all active subscriptions and see which monthly invoices have been paid or are overdue.

Actor(s): Founder and Director

Triggering Event: Director reviews subscriptions and invoices

UC-E24: Review caregiver records and payroll

Brief Description: The system shows the director how many verified hours each caregiver worked in a pay period, along with when their background checks expire.

Actor(s): Founder and Director

Triggering Event: Director reviews caregiver records and payroll

UC-E25: Review device and sensor status

Brief Description: The system gives the tech partner a quick look at how the home hubs and sensors are doing, checking battery levels and internet connections.

Actor(s): Technology Partner

Triggering Event: Technology Partner requests device status (query only under PTA)

UC-E26: Play medication reminder

Brief Description: The system tells the smart speaker to remind the member to take their medication exactly when their schedule says to.

Actor(s): None (System Temporal Event)

Triggering Event: Daily, at each reminder_time saved in the member's medication schedule

UC-E27: Check morning inactivity

Brief Description: The system checks if there has been any movement in the kitchen by the member's usual morning cutoff time to make sure they are up and safe.

Actor(s): None (System Temporal Event)

Triggering Event: Daily, at the member's morning cutoff (derived from wake-up time)

UC-E28: Send advance visit notice

Brief Description: The system uses the smart speaker to give the member a heads-up 24 hours before a caregiver is scheduled to visit.

Actor(s): None (System Temporal Event)

Triggering Event: Once per scheduled visit, at visit scheduled_time minus 24 hours

UC-E29: Generate daily wellbeing report

Brief Description: The system automatically builds a daily summary of the member's activity, visits, and alerts at the end of every day.

Actor(s): None (System Temporal Event)

Triggering Event: Daily, once per member at a fixed end-of-day time

UC-E30: Generate monthly wellbeing report

Brief Description: The system automatically gathers three months of daily activity data into a single long-term trend report every month.

Actor(s): None (System Temporal Event)

Triggering Event: Monthly, once per member; the report presents a three-month activity trend

UC-E31: Flag consent review as due

Brief Description: The system flags a member's account to remind the team that it is time for their mandatory six-month privacy and consent review.

Actor(s): None (System Temporal Event)

Triggering Event: Once per consent record, at review_date (consent_date plus 6 months)

UC-E32: Expire consent and stop monitoring

Brief Description: The system automatically stops monitoring a member if they pass their consent expiration date without finishing their six-month review.

Actor(s): None (System Temporal Event)

Triggering Event: Once per consent record, at expiry_date, if the review was not completed

UC-E33: Resume monitoring after pause

Brief Description: The system turns standard monitoring back on automatically as soon as the member's requested privacy pause runs out.

Actor(s): None (System Temporal Event)

Triggering Event: Once per pause, at pause_expiry_time (no later than 24 hours after the pause began)

UC-E34: Generate monthly invoice

Brief Description: The system automatically creates a new invoice for the family every month to keep their care subscription active.

Actor(s): None (System Temporal Event)

Triggering Event: Monthly, on each monthly anniversary of an Active subscription's start_date

UC-E35: Calculate caregiver payroll

Brief Description: The system automatically calculates how much to pay each caregiver at the end of the pay period based on their verified visit hours.

Actor(s): None (System Temporal Event)

Triggering Event: At the end of each pay period (length to be confirmed), per caregiver

UC-E36: Flag expired background check

Brief Description: The system warns the administration team when a caregiver's yearly background check is about to expire.

Actor(s): None (System Temporal Event)

Triggering Event: Annually, per caregiver, at bg_check_expiry_date

UC-E37: Escalate alert to family contacts

Brief Description: The system starts calling the member's family contacts one by one if the member doesn't answer the smart speaker within five minutes.

Actor(s): None (System Temporal Event)

Triggering Event: 5 minutes after the Arabic safety prompt, if no confirmation was received

UC-E38: Dispatch nearest available caregiver

Brief Description: The system automatically sends the closest available caregiver to the member's home if none of the family contacts pick up the phone after ten minutes.

Actor(s): None (System Temporal Event)

Triggering Event: 10 minutes of family contacts remaining unreachable

UC-E39: Dispatch emergency services (123) and notify family

Brief Description: The system immediately calls the 123 emergency service and notifies the family as soon as a hard fall is detected, skipping the speaker check entirely.

Actor(s): None (System State Event)

Triggering Event: Fall status changes from normal to hard fall detected while monitoring is active

UC-E40: Start speaker safety check-in

Brief Description: The system notices when a member is doing something outside their normal routine, like opening a door at 3 AM, and asks them through the speaker if they are okay.

Actor(s): None (System State Event)

Triggering Event: Sensor activity changes from matching the member's routine to deviating from it

UC-E41: Send fall detector wear reminder

Brief Description: The system uses the smart speaker to remind the member to put their fall detector back on if they take it off during the day.

Actor(s): None (System State Event)

Triggering Event: Wear status changes from Worn to Unworn or Charging during daytime hours

UC-E42: Notify neighbor volunteers

Brief Description: The system automatically sends a request to verified neighborhood volunteers when a non-urgent alert pops up in their area.

Actor(s): None (System State Event)

Triggering Event: A new alert is created with a non-urgent type, and verified volunteers exist in the member's district
